563 whether he is going to take all the children, only the boys, or none
586 at all. If the wife has to take care of the sons, the husband is required to pay toward their maintenance.

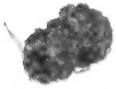
563 The weakness of their position and the looseness of the marriage
369 tie undoubtedly bear hard on the women in towns, who have no security in their home life. They are subject to divorce at any time, and
586 then may be left with no proper alimony to take care of their needs. The men are given great freedom to act according to whim. Cases are frequent where husbands have legally deserted wives, leaving them with one or more children to look after and insufficient or no maintenance. Conditions are better in the country; but even in towns the position of women is somewhat better than in most other Moslem societies.

III. Nomadic Moslems of Sinkiang

A. Family Organization

121 59 182 563 184 Among the nomadic Turkic Moslems of the Northwest the pattern of family organization is somewhat similar to that of the sedentary Turks, with two major distinctions; (a) there is an element of stability in the family institution of the nomads, in spite of the existent facility for dissolving marriages and contracting new ones, and (b) the influence of Islam is not nearly as strong as it is among the sedentary peoples. These differences are manifested in all aspects of family life, including its nuclear structure. The family unit consists of a man, his wife, and their unmarried
563 583 586 children. Cases of divorce and temporary separations are much more rare than among the sedentary Moslems, and consequently
184 the divorcee or separated daughter that often belongs to the sedentary family is absent in the nomadic family. Each family occupies
563 592 342 its own tent. The tents of the married sons generally are close to their parents' tent, and close contact between the various households is maintained.

563 592 In size, nomadic families equal those of the sedentary population. Many children, especially sons, are considered a manifestation of God's blessings. Due to the way of life and dependency
[162] [184] on economic cooperation the relationships within the family are maintained on a much closer basis. The wife shares much more actively in the economic burden. She takes care of the house, milks the animals, utilizes their products in many different ways (milk products, hides, wool, etc.). The husband's life is less burdened by economic tasks: taking care of the cattle, guarding them, setting the camps, selling, bargaining and hunting. The
[593] relationship between husband and wife is not as greatly influenced by the edicts of Islam. The women are less subject to the complete authority and mercy of their husbands, and to limited social contacts.



/Nomadic Moslems of Sinkiang/

563 593 [369] [434] Children and parents relationships differ also. They are characterized by a much greater economic interdependence. The children of the city-dwellers have a certain degree of economic independence, and have a small income of their own at an early age, but no opportunity of the sort presents itself to the nomadic children. [868] The sons help their fathers and learn from them how to manage the livestock, how to shoot and hunt, how to bargain and sell, etc... they remain attached to their families even after marriage, having no separate property of their own.

[868] The daughters have much to learn from their mothers, in preparation for the many responsibilities that they will have in the future, and their help around the house is extremely valuable and necessary. A daughter, however, does not retain her relationship with her family after she is married, but shifts her allegiance to her husband's family.

563 592 In the nomadic society, families constitute definite units of production. This is the basis for their unity and close cooperation. It is almost impossible for a couple to get along without the help of their children and it is rare that their children would be able to become economically independent. Moreover, the family framework provides for the educational, religious, and social needs for the individuals comprising it.

563 184 562 583 [586] B. Marriage and Divorce Customs

Among the Turkis of the plains, for example at Kashgar, women are at a discount, wives are cheap and divorces even cheaper. Among the mountain people (particularly among the Kirghiz) however, girls are at a premium and the would-be-bridegroom or his father has to pay a heavy brideprice, which usually amounts to ten to thirty yaks or their equivalent in other kinds of livestock. When 563 584 a boy has reached the age of six or seven and therefore may be expected to survive until manhood, his parents ordinarily betroth him to a neighbor's daughter of similar age. This betrothal is known as the qalam. The female relatives of both parties play a [583] leading part in the lengthy haggling about the brideprice which precedes it.

563 585 When all yaks have been paid, and the young people have reached the age of fourteen and sixteen years respectively, the bride's people invite all the neighbors to a feast at which the marriage is announced. The bride and bridegroom remain in their tents in the background and do not attend. The feast and announcement, known as the nikah, constitute the wedding, there being no other ceremony. However, the bridegroom cannot yet take his bride to his own home. She continues to live with her parents for a period of two to five months, during which the latter make and furnish an aq-oi (tent with its felts, rugs, wall hangings, screens, pots, pans, milk bowls, and other necessary items. The bridegroom continues

Northerners are never without it.

2. Patterns of living

a. Dwellings

Houses of the Chinese Moslems are similar to those of the Han Chinese in style and construction. Externally their mosques resemble Chinese temples. There is always Arabic writing carved in wood above the entrance of the mosque to mark its identity. But in Sinkiang the style of mosque architecture is not Chinese, and the buildings as a rule have minarets.

Village life is very much like that of the Chinese. People live in mud huts with lattice woodwork, windows and simple furnishings. Well-to-do people in cities and towns, where they usually congregate in separate districts, live in Chinese style houses distinguished by the carvings on the windowframes, doorways and woodwork inside, which are of elaborate Arabic design quite different from Chinese wood carving. In both rich and poor homes the ancestral shrines and tablets are missing, and in their places are scrolls with Arabic writings or passages from the Koran. In the northern and western parts of this region the living quarters are simpler. There are colonies of flat-roofed mud houses built along the cliffs.

b. Food

Food habits are similar to those of the Han Chinese, though Moslems do not eat pork and consider it unclean. Meat is a luxury for the poor. Mutton is preferred, though beef is also used. In the western part of the region the very poor use horse meat, though it is forbidden by their religion. Vegetables are a part of their daily diet. In the northwest part of Sinkiang, fruits such as apricots, plums, mulberries, melons and grapes are available, as well as smaller quantities of pomegranates, apples and pears.

Mutton fat, butter and linseed oil are used for cooking. In eastern Sinkiang the style of cooking is influenced by the Persian, Chinese and Turkish styles. The Chinese Moslems abstain from wine, and are not much addicted to the smoking of opium. They do not like to eat with non-Moslems, especially the Han Chinese, because they consider pork eaters unclean. Strict followers of the religion even avoid eating utensils which have been used by others, and carry their own bread when they travel. No meat may be eaten unless the animal was killed according to prescribed religious ritual.

The style of dress for both sexes is generally the same as that of the Chinese except for the headdress. The Dungan men can be recognized by their white skullcaps, embroidered with a faint design in colored thread, whereas the usual cap of the Turk or Kazakh is colorful and more richly embroidered. Some Dungans dress in gray and wear white or blue caps. For ceremonial occasions or worship, the Imams, Ahungs and Mullahs, who sit

/Chinese Moslems (Dungans)/

within the railings in the mosque and read the Koran, wear white or green turbans, the leader's turban being more elaborate, with a tassel hanging down the back. Common people wear pointed octagonal caps of white, red or black, the color distinguishing the sect to which they belong.

Some women dress differently from the Chinese women, and wear a sort of turban hat. Ordinarily their dresses are in dark colors, but they may wear gay colors for festivals. According to ancient custom they must veil their faces in the presence of men, but this custom was abandoned long ago.

In cities and towns where the Chinese Moslems dress exactly like the Han Chinese, the men can be distinguished by their physical build and features, but the women are not easily recognized.

d. Occupation

Most Chinese Moslems are business men and traders, and most of them also farm. As farmers they are not equal to the Han Chinese, but they excel in dealing with cattle and everywhere they monopolize the beef and sheep trade. They are also merchants, bakers, workers in jade, money changers, and inn and restaurant keepers.

Outside a Moslem-owned restaurant there hangs a sign displaying a water pot surmounted by a dress hat, and two Chinese characters, Hui-hui. The pot signifies ceremonial cleanliness and guarantees that no pork is used. The hat indicates respect to customers. There are also two Chinese characters on the tea pot, meaning "Pure and True."

Formerly their religion forebade the Moslems to become money-lenders, barbers, fortune-tellers, actors, or servants or apprentices to the Chinese. How strictly the people now observe this taboo is not known.

3. Social values

a. Group spirit

The we-feeling is very strong among the Dungans. The whole group will sacrifice time and money for an individual oppressed by outsiders, and fight for him until justice prevails. Endowed with a courageous nature, the Moslem man is willing to sacrifice his life for the welfare of the group.

This spirit is shown by overt expression in daily social relationships. The Chinese title Lao-piao (old cousin) is applied even to a stranger of the same religious faith. The word old signifies respect; cousin signifies blood relationship. Hence Lao-piao indicates a feeling of closeness toward all members of the faith. Another expression of this feeling is found in the saying that "every Moslem in the world belongs to the same family."

b. Concept of charity

Many of the values in Chinese Moslem society are based upon

/The New Uighurs/

000 can marry easily, and divorce their wives even more easily. A
563 farmer seldom has more than one wife, but a city man usually
[595] has at least two, living in different parts of town. The marriage
[561] age for girls is twelve to fourteen; for boys, fifteen to sixteen.
[582] Matches are arranged by parents, and often the children have
[584] known and played with each other for years. Ceremonies are
563 performed at the girl's first marriage. Her parents invite all
585 their neighbors to a feast, at which the leaders of the mosque
are also present. Together the bride and bridegroom eat some
bread dipped in salt water. Customarily the bride and her
[152] mother weep and wail aloud during the ceremony. The mullahs
are paid a fee for performing the rites, and food and money are
given to beggars. All expenses are paid by the bride's family.
The only liability incurred by the bridegroom is the hagg-i-mihr,
a settlement for his wife. Theoretically the wife can claim this
settlement at any time before her death, but it is never claimed
except at divorce, and occasionally this old tradition is omitted.

A procession of musicians accompanies the bride, who rides a pony or donkey or walks in front of the others from the home of her parents to the home of her husband. When she arrives at her new home, she is lifted over the threshold by her husband and his relatives.

[556] Several days after the wedding, the bride's family, if wealthy, gives one party for the men of the two families, and one for the women.

b. Coming of age

563 Women do not reach their full social status until they are
562 thirty or older, when they attain the dignity of jawanlik. A
885 woman who has reached this age of discretion is called a jawan,
[302] and is privileged to braid her hair in two long plaits.

This coming of age is celebrated by a feast known as jawanlik toi, given by the husband. For the first time the woman appears with her braids, and wearing a special shirt known as the jawan-chi konglak. After this celebration she is more important in the home and commands more respect from others. She is also
[581] worth more on the marriage market, as the younger bride has a tendency to run back to her parents. A New Uighur man would rather obligate himself heavily to marry a good-looking jawan
[533] than to take a young girl. The word jawan can always be found
[539] in their love songs, as in the following example:

"Who is it who knows what health is worth?
Not the healthy man who has never been ill.
What woman is it that knows worth in a man?
Not the girl who has never been a jawan." (Skrine 1926:203)

c. Remarriage

563 Remarriage is not condemned in New Uighur society. The
587 average man is a lazy, good-natured, easy-going and rather

1: Washington S-4 (no date) 1956 AF13 Northwest China

/Western Mongols or Torguts/

As
563 their forefathers had much contact with the Russians and the
177 Chinese, they are more or less influenced by the culture and civilization of both. The Chinese influence appears to be the strongest.

563 Largely nomads, the West Mongols live a life similar to that
233 of their nomad brothers of Inner Mongolia. Only as a last resort
[171] do they abandon tent life and take up agriculture.
[241] The nobles who live in cities dwell in houses that are a com-
563 bination of Tibetan and Occidental architectural style, flat-
565 roofed, whitewashed, and with walled-in courtyards. Like the
369 Chinese, they sleep on k'angs. One often finds Russian furniture
342 in the house, Chinese embroideries decorating the walls, and
177 red silk draperies with Mongolian mottoes.
[352] The ordinary people wear long gowns of Chinese cut, but the
[353] customary Mongolian sash and equipment (see clothing section
563 of IMAR Handbook). A young man wears a long gown with a
291 sleeveless velvet waistcoat on top. Formerly, the officials
177 wore silk robes of Chinese cut, and the decorative cap of Imperial times with a peacock feather to signify the position of chieftainship. Nowadays they wear a Chinese style long gown with a sleeved jacket (ma-kua).

563 Food of the West Mongols is similar to that of other nomadic
322 peoples, but when the rich entertain, the cuisine is a combina-
261 tion of Mongolian, Chinese and Russian styles.
556
177

563 262 mutton fat they bake a type of bread resembling a doughnut. The best liked meat is horsemeat, but it is a dish only for the well-to-do. The daily menu comprises boiled and roasted mutton, with rice, if any is available, milk, cheese made from yaks' and sheep's cream, and small fried pieces of mutton. The main drink [273] is kumis. It is prepared from mares' milk by shaking it in a leather bottle and then leaving it to ferment.

563 262 779 Both the sedentary and nomadic Turks of Sinkiang are bound by Moslem dietary laws, which generally are strictly observed. The Koran expressly prohibits eating four things: (1) the animal which dies of itself, including "the strangled animal, and that beaten to death and that killed by a fall and that killed by being smitten with the horn and that which the beasts have eaten", (2) the blood of slaughtered animals, (3) the flesh of a swine, and (4) an animal which has not been slaughtered by a Moslem according to the prescribed rules in the Koran and over which the name of Allah has not been invoked. The drinking of alcohol, except [273] for medicinal purposes, is also prohibited by the Koran. However, [369] the Moslems of Sinkiang, particularly the city-dwellers, drink frequently.

Moderation in eating is recommended by the Koran in the following passage: "...Eat and drink and be not immoderate!" (7:31). But abstention from foods allowed by the Koran is discouraged: "O people! Eat the lawful and good things of what is in the earth!" (2: 168) Moslems are warned both against undereating and overeating as, for example, can be seen in the following directive: "O you who believe! Forbid not yourselves the good things which Allah has made lawful for you and exceed not the limits." (5:87)

Except for things prohibited in the Koran, the Eastern Turks enjoy most food. They eat a fairly well-balanced diet containing some meat, vegetables, fruits, and starches. Starches, however, far exceed the other food items. The most noticeable deficiency in diet is the lack of food containing iodine. They do not have access to much sea food, being so far inland.

B. Turkic Concepts of Disease

753 779 In Eastern Turkestan the cause of disease is attributed both to God and to the evil spirits, called "jins". According to Moslem [784] belief, disease is often a result of disobeying God's laws and directives. God's penalties for disobedience and his way of testing the True Believers take the forms of inflicting epidemics on the population. Man can avoid misfortune by being obedient and by putting his trust completely in God. The Headith (Moslem Tradition) reports that when the Prophet was asked about the Plague, he said that it was an infliction which Allah imposed upon anyone, but that he made it an occasion for the exercise of his compassion towards

/Chinese, Chinese Moslems and Sedentary Tibetans/

the Chinese in the Northwest meets with several obstacles. The one most difficult to overcome is the lack of attitudinal uniformity due to a multitude of historical, environmental and social factors which have molded the people's behavior in the Northwest. There is, to begin with, the difference between the urban and the rural situation, which even though prevalent all over China, has made for a specially pronounced diversity in the Northwest. Generally speaking, in centers like Sian or Lanchou attitudes are met with which do not differ too much from those prevalent in other cities of China. It has to be taken into account, though, that Sian has been the capital of the Chinese Empire for centuries up to about one thousand years ago, and this fact still shapes certain attitudes of the citizens of Sian today. Lanchou, on the other hand, is most definitely a frontier city, the last major outpost of Chinese civilization with an ostentatious pride in local traditions and relics of a cultural or esthetic nature, but open,on the other hand, to a colorful mixture of influences coming from a variety of peoples beyond the pale. The urban attitudes prevalent in Sian and Lanchou thus differ perceptively and both cities differ in certain respects from other Chinese metropolises. Their peculiarities influence in turn urban-rural and social tensions in a specific way.

N

369
829
S
563
•369
829

The Chinese rural scene, on the other hand, displays a variety of factors accounting for attitudinal diversity. There are the differences of the loess-cave dwellers and the mud-hut dwellers, those of the irrigational farmer and the one on hills or mountain slopes; there are regions of compact minorities or dominant majorities of Moslems and finally, regions along the few great thoroughfares and regions of remote seclusion.

The picture gains in complexity in the real frontier areas, Western Kansu, Chinghai and Sinkiang, where the Chinese constitute a minority. Here the diversity of peoples with whom the Chinese have contact, the geographical differences, the professional differences, differences of the duration of stay, of the home province of the settlers account for attitudinal patterns which change from settlement to settlement.

S
N
[128]
[129]

What is attempted in the following pages is, in view of the difficulties, and furthermore, in view of the pitifully scanty coverage of the area in the literature, to present a few samples of pertinent observations, which might add up to some general notions. In the selection, stress has been laid on the frontier regions, as the regions within the pale, reference still can be made to the General Handbook.

36
[127]

In their book, The Gobi Desert (New York, 1944), Mildred Cable and Francesca French describe the Chinese people's life in the fortress of Chia-yu-kuan in Western Kansu, which they visited in the thirties: "Inside of the fortress, life was divided into three distinct sections, each of which had an existence quite

N
*175 going to the polls, but in Chinghai where it was reported that 95
666 per cent of the people went to the polls, the election was only one-
*668 fourth completed.

In Sinkiang, the Communist authorities were more cautious.
S The experimental elections began in May, 1953, in 17 basic elec-
175 tion units (hsiang) selected from the ten administrative districts,
666 then in 36 basic election units. In these experimental elections,
668 80-95 per cent of the electorate turned out. With the successful conclusion of the experiments, the real basic level elections began in September in 665 basic level areas in Sinkiang, followed in December by the second group of 860 basic level area elections. By April, 1954, the basic level election in Sinkiang was concluded,
S having been held in 2,424 basic units in 83 counties and munici-
[369] palities. In urban areas, 89 per cent of the voters turned out, while in southern Sinkiang, the turnout by the Uighur population was 95 per cent. The elections during 1953 had been supervised by 1,127 cadres who formed 144 election courts and 98 mobile investigation teams, which uncovered 204 cases of irregularities and nonconformity.

The fruit of the efforts of the election cadres was the election of large numbers of cadres and party members. Sixty-three per cent of the 619 new party members employed in the Sinkiang provincial and Urumchi municipal governments were elected as delegates. In 312 hsiang in Sinkiang, out of the 7,088 of the delegates elected, 5,248 were Communist Party cadres, and the bulk were Chinese. In Ninghsia, only 25 per cent of the 9,700 deputies elected in the basic level elections were Chinese Moslems (Hui).

N Moreover, the elections in the Northwest, as in the rest of
*175 China, were by no means universal. Vice-premier Teng Hsiao-
666 p'ing, one of the top officials in charge of the nationwide elections,
*668 revealed that basic level elections were not held in a quarter of
641 the regions inhabited by national minorities, and the number of
*563 national minority people who were not given a chance to vote came to 8,708,169. The reason for defranchising these minority people, he said, was due to the "lack of requisite conditions," which were (1) the native cadres were unsatisfactory and (2) the people failed to appreciate the nationality policy of the government. (NCNA June 19, 1954).

N In contrast to the publicity given to the basic level elections
*175 in the Northwest, the elections on the higher levels were conducted
*668 quietly and, in many cases, the results were not published. How-
666 ever, from scattered information gleaned from the Communist
635 press, the following picture emerges: in Shensi, Kansu, and
S Sinkiang, the incumbent governors were re-elected. Only in
[175] Chinghai, was there a change in the governor. In these four pro-
[666] vinces, three of the governors are Chinese. In the three provinces
[668] of Shensi, Kansu and Chinghai, about half of the thirteen vice -
[635]
